# برنامج تكنولوجيا هندسة الطيران التخصص هندسة هياكل ومحركات الطائرات Airframe & Powerplant Engineering رقم المادة الدراسية 20607127 اسم المادة الدراسية اصلاح هياكل الطائرات Aircraft Structure Repair عدد الساعات المعتمدة (3)

(0)

### وصف المادة الدراسية:

This Subject Describes the Metallic and Non Metallic Construction of Aircraft Structure, the Types of Structural Loads and Stresses Acting on Structural Members, Types of Sheet Metals, Tools, Rivets and Fasteners Used in Repairing structural Parts, Methods and Procedures of Repairing Metallic and Non Metallic Structure, Welding and Painting Aircraft Structural Parts.

أهداف المادة الدرسية :

بعد دراسة هذه المادة يتوقع من الطالب أن يكون قادراً على تحقيق الأهداف التالية:

- 1- Identify Metallic and Non Metallic Aircraft Construction.
- 2- Identify Sheet Metal Tools and Fasteners.
- 3- Understand the Methods and Procedure For Inspection & Repair of Metallic Aircraft Structure.
- 4-Identify the types of Wood Structures.
- 5- Identify the composite Structures.
- 6- Identify Plastic Materials and Fabric Covering.
- 7- Identify the Types and Methods of Welding.
- 8- Deal with Aircraft Painting and Finishing Processes

#### Subject : Aircraft Structure & repair

#### وصف المادة الدراسية:

Recognize Structural Parts, Performing Aircraft Skin and Structural Repair Using Various Types of Rivets and Fastener Use Repair Tool's and Machines for Drilling, Cutting Riveting Bending and Fabricating Structural Parts, As Well As Welding and Painting Metal Parts.

أهداف المادة الدرسية:

#### بعد دراسة هذه المادة يتوقع من الطالب أن يكون قادراً على تحقيق الأهداف التالية:

- 1- To Identify Aircraft Metal Structure Repair.
- 2- To Identify the Types of Wood.
- 3- To Identify Composite Structural.
- 4- To Identify Transparent Plastic Materials.
- 5- To Identify Welding Processes.
- 6- To Identify Inspection of a Good Weld.
- 7- To Identify Aircraft Painting Processes
- 8- To Identify the methods of wing covering.
- 9- To Identify Paint Removal.
- 10- To Identify Finishing Equipments Adjustment.
- 11- To Identify the types of finish defects.

## **Subject: Aircraft Structure Repair(Workshop)**

1	Cabin Atmosphere Control	Flight physiology  The atmosphere. Human respiration and circulation  Hypoxia. Carbon monoxide poising.  Oxygen and pressurizing systems  Oxygen system. Characteristics of oxygen.  Source of supplement oxygen Oxygen system and components Oxygen system servicing. Prevention of oxygen fire or explosions.  Pressurization systems. Pressurization problems. Source of pressurization. Control of cabin pressure.  Cabin climate control systems.  Ventilation systems. Exhaust shroud heater Electric heating system. Combustion heaters. Compressor bleed air heater. Aircraft air conditioning systems. Air-cycle air conditioning. Vapor -cycle air conditioning. Service equipment. System servicing.	11 weeks
2	Airframe Ice and Rain Control	Cabin climate control systems.  Ice effects.  Visual detection.  Electronic detection.  Optical ice detectors.  Contaminant /fluid integrity measuring system(C/FIMS ™)  Anti-icing systems.  Thermal anti-icing.  Electric anti-icing.  Chemical anti-icing.  Weeping wing  De-icing systems.  Rubber DE-ICER boots system.	5 weeks

التاريخ	نسبة الامتحان من العلامة الكلية	الامتحانات
التاريخ : الاسبوع السادس		الأول
التاريخ: الاسبوع الثاني عشر	20%	الثاني
التاريخ: / /	10%	أعمال الفصل
التاريخ: الاسبوع السادس عشر	50%	الامتحانات النهائية
التاريخ : الاسبوع السادس		المشروع والوظائف

طرق التدريس:

يحدد عضو التدريس الطريقة المستخدمة من خلال (محاضرة ، عرض، مناقشات، مختبرات)

الكتب والمراجع:

Jeppesen ( A&P Airframe Text Book).

# برنامج تكنولوجيا هندسة الطيران

هندسة هياكل ومحركات الطائرات	التخصص
Airframe & Powerplant Engineering	
20607237	رقم المادة الدراسية
نظم التحكم بقيادة الطائرة والتفتيش على صلاحيتها	اسم المادة الدراسية
Aircraft Flight Control Systems	
& Airworthiness Inspection	
(2)	عدد الساعات المعتمدة
(2)	عدد الساعات النظرية
(0)	عدد الساعات العملية

## وصف المادة الدراسية:

Deals With Aircraft Structure Design and Construction, Fuselage And Wings Structures, Powerplant Support Structures, Stability And Control, Primary and Auxiliary Flight Control Systems, Rigging and Alignment of Aircraft Major Structure and Control Surfaces, Forces Acting on Fixed and Rotary Wings Aircraft, Types of Rotor Systems, As Well As The Methods and Procedures of Aircraft Inspection.

أهداف المادة الدرسية:

بعد دراسة هذه المادة يتوقع من الطالب أن يكون قادراً على تحقيق الأهداف التالية:

- 1- Identify the Design and Construction of Aircraft
- 2- Distinguish Between Types of Aircraft Structure.
- 3- Identify the Function of Aircraft Major Structural Parts and Control Surface.
- 4- Identify Airplane Axes, Stability and Control
- 5- Perform Control Cables Inspection & Adjustment
- 6- Aircraft Study the Fundamentals of Rotary Wing.
- 7-Identify Required Airworthiness Inspections.
- 8- Know Inspection Guidelines and Procedures

## **Subject: Aircraft Flight Control Systems & Airworthiness Inspection.**
